

Prepared for Staffing Pro

AI Implementation Plan Summary

About us

Vettd has been building AI solutions in HR since 2014. Our team of data scientists and developers from Princeton, Carnegie Mellon, Drexel, and Rutgers have created our state-of-the-art platform. We have become experts at marrying AI solutions with HR problems with practice and we'd love to support you and your team.

What we do

We solve the issues you face in relation to talent data with web apps, professional services, or our API depending on your situation. Our team of AI experts will listen to your goals, create your custom strategy, and help you execute. Our technology and methods help you adopt AI solutions guaranteed to make a difference.

Project Overview

Search firms like yours are typically looking to increase their team's capacity in order to take on more job requisitions each year. In addition, focusing on improving the speed, depth, and accuracy of the research process tends to lead to great business outcomes. This proposed project overview addresses each of these with AI that augments your team's capabilities to improve efficiency.

- 1. Custom Neural Networks that replicate your teams candidate profile evaluation methods.
Improve efficiency by filtering candidate data at scale
- 2. Aggregate existing databases from LinkedIn, Indeed, etc. to create a baseline database of profiles.
Consistent data becomes your proprietary talent pool
- 3. Web app that allows your team to create prioritized shortlists from your central database.
AI enables your team to spend less time researching
- 4. Learning algorithm to predict quality candidates likely to get interviews based on placement results.
Ensure your AI solutions grow with you

Next Steps

Hopefully, this gave you some ideas on what Vettd can do for you. We'd love to keep the conversation going and expand on these ideas with you. Please reach out to us at info@vettd.com if you want to make a meaningful change in how your organization deals with talent data.
